8. Contact Us

1. Introduction

Shree Balaji Agro Fuels is a leading manufacturer of biomass briquettes and biomass pellets. Our products are made from sustainable biomass resources and offer a cleaner and more efficient alternative to traditional fossil fuels.

2. Biomass Briquettes

What are Biomass Briquettes?

Biomass briquettes are a type of biofuel made from compressed biomass materials such as agricultural waste, forestry residues, and other organic materials.

Benefits of Biomass Briquettes

- Renewable and Sustainable: Biomass briquettes are made from renewable biomass resources.
- Carbon Neutral: Biomass briquettes produce minimal greenhouse gas emissions.
- Energy Efficient: Biomass briquettes have a high calorific value.

Applications

- Industrial Boilers: Biomass briquettes can be used as a fuel source for industrial boilers.
- Power Generation: Biomass briquettes can be used for power generation in biomass power plants.

Technical Specifications

| *Parameter* | *Specification* |

| ----- | ----- |

| Calorific Value | 3500-4500 kcal/kg |

| Density | 1.1-1.3 g/cm³ |

3. Biomass Pellets

What are Biomass Pellets?

Biomass pellets are a type of biofuel made from compressed biomass materials such as wood waste, agricultural waste, and other organic materials.

Benefits of Biomass Pellets

- High Energy Density: Biomass pellets have a high energy density.
- Easy to Transport: Biomass pellets are easy to transport and store.
- Renewable and Sustainable: Biomass pellets are made from renewable biomass resources.

Applications

- Power Generation: Biomass pellets can be used for power generation in biomass power plants.
- Industrial Boilers: Biomass pellets can be used as a fuel source for industrial boilers.

Technical Specifications

Parameter	*Specification*
----- -----	
Calorific Value	4000-5000 kcal/kg
Diameter	6-8 mm
Length	10-30 mm

4. Why Choose Shree Balaji Agro Fuels?

- High-Quality Products: We offer high-quality biomass briquettes and pellets.
- Sustainable: Our products are made from sustainable biomass resources.
- Competitive Pricing: We offer competitive pricing for our products.

5. Our Products

We offer a range of biomass briquettes and pellets made from different biomass materials.

- Agricultural Waste Briquettes: Made from agricultural waste such as rice husk and straw.
- Wood Waste Pellets: Made from wood waste such as sawdust and wood chips.

6. Quality Control

We maintain strict quality control measures to ensure that our products meet the highest standards.

- Raw Material Inspection: Inspection of raw materials for quality and consistency.
- Production Monitoring: Monitoring of production process to ensure quality and consistency.
- Final Product Testing: Testing of final product for calorific value, moisture content, and ash content.

7. Packaging and Storage

Our products are packaged in durable bags or containers to ensure safe transportation and storage.

- **Packaging:** Packaging in 20-25 kg bags or containers.
- **Storage:** Storage in a dry and well-ventilated area.
